COMPLETE STEERING SUSPENSION

RANGE

BALL JOINT

- Connects knuckles and control arms for precise steering and a smooth ride.

CONTROL ARM

- Connects knuckle to frame. Controls wheel movement for stability and alignment.

TIE ROD END (OUTER)

- Connects linkage to steering knuckle. Transmits steering input for precise wheel control.

RACK END (INNER TIE ROD)

- Connects steering rack to outer tie rod. Transmits input and maintains alignment.

STABILIZER LINK

- Connects anti-roll bar to suspension. Limits body roll for better stability.

CENTER LINK (DRAG LINK)

- Transmits motion from Pitman arm to tie rods. Ensures synchronized wheel turning.

PITMAN ARM

- Connects steering box to center link. Converts rotational motion into linear movement to turn the wheels.

IDLER ARM

- Bolts to frame and supports the center link. Maintains proper linkage height and alignment.

BALL STUD

Surface
**ROUGHNESS
AND LUSTER**

**THE SMOOTHER WE MAKE IT,
THE LONGER YOU ENJOY IT.**

- THE POLISHED BALL STUD HELPS REDUCE FRICTION, PREVENTING SURFACE FRACTURE, CRACKING, ABRASION, AND OTHER DAMAGES, MEANING OUR PRODUCTS ARE DURABLE FOR A LONGER TIME AGAINST THESE TYPES OF DAMAGE.
- KYB BALL STUD SURFACE IS VERY SMOOTH FROM POLISHING. THE SMOOTHNESS HELPS LESSEN THE DETERIORATION THAN IT SHOULD BE.

Why Choose **KYB** Steering Suspension?

OEM QUALITY

KYB Ensures Reliability Through Strict Manufacturing Standards And Precise Fitment:

- **OEM-level Quality:** Components match the quality of genuine parts used by vehicle manufacturers.
- **Perfect Fit:** Center distances are accurately engineered to fit seamlessly with original vehicle components.

WIDE COVERAGE

KYB Offers Its Extensive Coverage And Readiness To Serve A Broad Market:

- **Wide Model Coverage:** Products fit a large variety of car models.
- **Product Variety:** Key steering and suspension ranges are offered, such as ball joint, tie rod end, rack end, stabilizer link, control arm and so on.

LONG LIFETIME

Kyb Highlights The Strong Durability And Performance Of Its Components:

- **Wear Resistance:** Ultra-smooth ball stud surface reduces friction and wear.
- **Strong Structure:** One-piece (uni-body) ball stud design increases strength and durability.
- **Anti-Rust Material:** Black iron oxide provides effective corrosion resistance.
- **High-quality dust boot:** Flexible, tear-resistant boot protects against contaminants and keeps lubricant sealed.
