PRODUCE BY
KYB ASIAN PACIFIC CORPORATION

Foreword

Performance Redefined: Precision Engineering for Every Terrain

The moment you ignite the engine and steer into the open world, one thing matters above all: **"Confidence."**

KYB Asian Pacific Corporation proudly presents the **KYB JAOS** high-performance suspension series. Born from our relentless research and development, we fuse top-tier Japanese shock absorber technology with rugged off-road DNA. The result is a suspension system that strikes the perfect balance between "On-Road Comfort" and "Off-Road Performance."

Inside this catalog, you will discover the innovations we take pride in—specifically the **"Harmofleq"** intelligent frequency-sensitive valve technology. This system eliminates the harshness often found in lifted vehicles, transforming the ride into one that is smooth, firm, and responsive. Paired with our Titanium-infused (Ti-W) springs, we ensure unmatched durability for every adventure.

We are not just manufacturing shock absorbers; we are establishing a new standard for your driving experience. This is the innovation KYB Asian Pacific is dedicated to delivering, ensuring that your every journey is... more perfect than ever.

KYB Asian Pacific Corporation Ltd.

JAOS ADAMAS BL5

The ADAMAS BL5, which uses many flat surfaces, changes its appearance dramatically depending on the color.

Therefore, we offer two colors: "Smoke Polish Black" (pictured left), which has a polished surface coated with a smoke clear, and the basic "Matte Black."

**The color of the actual product may differ from that shown in the photo.*

 ジャオススタイルの新たなスタンダード

JAOS ADAMAS BL5

JAOS WHEEL

JAOS ADAMAS BL5 6H

The rim face of the ADAMAS BL5 is designed with a flat shape reminiscent of a beadlock to express the weightiness of a 4WD & SUV. However, if it actually increases the weight, the effect of switching to an aluminum wheel will be halved. Therefore, by applying an undercut treatment that hollows out the back of the rim, we have achieved both lightness and weight.

	ID	SIZE	INSET	HOLE	PCD	COLOR
	B901560MPB	15 inch x 6.0 J	+33 mm	6	139.7 mm	Matte Polished Black
	B901665MPB	16 inch x 6.5 J	+38 mm	6	139.7 mm	Matte Polished Black
	B901666MPB	16 inch x 6.5 J	+48 mm	6	139.7 mm	Matte Polished Black

JAOS WHEEL

ADAMAS MIL-8

Images are for advertising purposes only and are not affiliated with any car manufacturer.

JAOS' first wheel for compact SUVs, the "JAOS ADAMAS MIL-8." In addition to the circle hole design typical of off-road wheels, the rim accents enhance the rugged look. The matte gunmetal finish matches any body color, and its versatile size means it can be fitted to a wide range of compact SUVs. It creates a wild look for your feet.

	ID	SIZE	INSET	HOLE	PCD	COLOR
	B904445MGM	14 inch x 4.5 J	+ 45 mm	4	100 mm	Matte Gunmetallic

JAOS ASTELLA CM-04

This 17-inch one-piece aluminum wheel for the Hiace and Caravan was jointly developed by JAOS and Enkei Co., Ltd. Based on a five-dish design, the design incorporates the air circulation holes of the ENKEI MotorSport ES-131 and ES-161, which are used in the world's top racing scenes, creating an aluminum wheel for transporters that combines a sporty feel with a powerful off-road look.

	ID	SIZE	INSET	HOLE	PCD	COLOR
	B879765DG	17 inch x 6.5 J	+ 48 mm	6	139.7 mm	Deep Gunmetallic

JAOS WHEEL

JAOS ASTELLA CM-05

Images are for advertising purposes only and are not affiliated with any car manufacturers.

This wheel features a simple structure with an understated disc design, yet is particular about creating a three-dimensional effect. The six spokes and rim have been given a three-dimensional appearance, giving impact to the simple spokes and rim. Furthermore, the six spoke ends, which extend radially and drop deeply, emphasize the rim's unevenness, further accentuating the three-dimensional effect. This is a special wheel that pursues a powerful and sophisticated form that blends in with the body size of the Hiace.

	ID	SIZE	INSET	HOLE	PCD	COLOR
	B872765MGM	17 inch x 6.5 J	+ 38 mm	6	139.7 mm	Matte Gunmetallic

BACCHUS CM-11

The image color, Smoke Polish Black, as its name suggests, gives the polished surfaces of the spokes and rim flanges a smoked finish, creating a powerful and dazzling look for your feet.

In contrast, the new color, Matte Ash Bronze, is first painted silver metallic, then machined on the flat areas, and then overcoated with black clear and matte clear, resulting in a deep, pale color with a matte finish.

	ID	SIZE	INSET	HOLE	PCD	COLOR
	-	20 inch x 8.0 J	+ 40 mm	5	114.3 mm	Smoke Black Polish
	B882086SPB	20 inch x 8.5 J	+ 18 mm	6	139.7 mm	Smoke Polished Black
	B881095SPB	20 inch x 9.5 J	+ 53 mm	5	150 mm	Smoke Polished Black

JAOS WHEEL

EXCEL JX3

The third in the EXCEL JX series of wheels specifically designed for the Jimny. The traditional split 5-spoke design of the EXCEL series has been further carved, and a fin-like motif has been added to emphasize the rugged look. Furthermore, a special mold has been created for the 6.0J wheels for the Jimny Sierra, achieving a deep rim never before seen.

The 5.5J for Jimny weighs approximately 6kg, and the 6.0J for Jimny Sierra weighs 6.4kg, achieving both a striking design and lightweight design. The chic matte gunmetal coloring makes it suitable for any vehicle body color.

	ID	SIZE	INSET	HOLE	PCD	COLOR

JAOS WHEEL

JAOS TRIBE

Images are for advertising purposes only and are not affiliated with any car manufacturer.

The first in the TRIBE series, "JAOS TRIBE," was developed in collaboration with ENKEI (Enkei Corporation), an aluminum wheel manufacturer boasting a leading market share both domestically and internationally. In fact, development began in conjunction with the re-release of the Land Cruiser 70.

Based on the concept of "a wheel worthy of the Land Cruiser 70, an icon of heavy-duty 4WD," the design motif is an ornate steel wheel, while ENKEI's latest manufacturing method, the "MAT PROCESS," is used. This combines a heritage look with a lightweight design suitable for modern times.

	ID	SIZE	INSET	HOLE	PCD	COLOR

JAOS WHEEL

JAOS TRIBE CLAW

Images are for advertising purposes only and are not affiliated with any car manufacturer.

The second in the TRIBE series, "JAOS TRIBE CLAW," was developed in collaboration with ENKEI Co., Ltd., an aluminum wheel manufacturer boasting a leading market share both domestically and internationally. This high-performance wheel was designed from the outset to be fitted to TEAM JAOS's rally cars. The rim is made using MAT PROCESS molding, which achieves material strength comparable to that of forged materials. The six spokes, concave towards the center, combine outstanding brake cooling with a tightly tapered rough mesh shape. This is a genuine 4WD wheel that combines sporty agility with rugged dynamism.

	ID	SIZE	INSET	HOLE	PCD	COLOR

Images are for advertising purposes only and are not affiliated with any car manufacturer.

The JAOS TRIBE CROSS represents the third installment in the TRIBE series, meticulously developed in collaboration with the world-renowned aluminum wheel manufacturer, ENKEI. This high-performance wheel integrates extensive technical know-how to meet the demanding specifications required for TEAM JAOS's rally machines. By utilizing the advanced MAT PROCESS, the rim achieves a level of material strength comparable to forged wheels while maintaining an impressive lightness, further enhanced by a double flange shape for superior impact resistance and specialized fin-like ribs along the outer periphery. The design features ten concave spokes with hollowed-out sides that create a distinct visual depth from various angles, ultimately providing a 4WD wheel that balances sporty agility with the robust strength necessary to match a vehicle's body volume.
